

ABSTRACT

[96] Aspects of the invention may comprise determining personal media and/or broadcast media that is to be presented in a communication channel. A schedule for presenting the personal media and/or broadcast media in the communication channel may be determined and the schedule comprising representations of the personal media and/or broadcast media presented in a media guide. The media guide may be presented in a graphical user interface that may comprise aural and/or visual representations of the personal media and/or broadcast media comprising audio, text, video and/or graphics. The graphical user interface may be controlled by a keyboard, a mouse, a remote control and/or a microphone, for example. The schedule may be adapted to correlate a particular one of the personal media and broadcast media to at least one of a time, a day and a year for presenting the personal media and/or broadcast media in the communication channel.
